July Topic (2024)

Brainstorming	Structure of the essay + ideas + vocab
Type of task 2	Intro Rephrase + opinion
Ideas	B1question 1 TEXS In the beginning, Many youth leave their home countries and travel to other destinations for economic reasons. In other words, when students graduate, they prefer to travel to increase their income and hunt a steady job. An eminent example is Egypt where many graduates travel to the Gulf countries especially when they feel underpaid because of the

	economic recession in Egypt. What can be said is that (cleft) this poses a threat to the economy of any country since experienced and qualified cadres go to other countries in quest of financial security. B2 question 2 In addition, this social trend is considered a positive development. (better education) Hence, those returning from other countries with a better level of education can benefit their countrymen. Conclusion

- Why do you want him/her to read it?
- Tell him/her how to get the book.

=====

Informal style:

- Contractions (don't/ isn't)
- Use of idioms
- Emotional writing

- =====

Hi Mike,

What's happening, bro? Hope you're doing fine. You know what, after leaving work, I've got a plenty of free time nowadays and I've recently read an amazing book; it's called *The Pursuit of Happiness* by a writer named Chris Gardner. You've got to read it because I'm sure you'll enjoy every word in the novel.

The first point is that it's a story of a middle-aged African American who struggles in his marriage and he's left unemployed towards the middle of the plot. Actually, the novel walks you through the journey of suffering which the heartbroken hero undergoes. Despite the fact that the prevailing tone is melancholic, you'll definitely enjoy the success at the end of the story.

Another thing I want to say is that I think some quotes will be motivating for you especially that I know that you are going through some personal and professional hardships. As far as I recall, there's the father's advice in the novel to his kid, "protect your dream."

Lastly, if you still feel down in the dumps, you're advised to read the book and I guess you'll find it in Alef Bookstore which is located in Maadi. The bookstore is just next to the Metro Station and it's open from 9 AM till 10PM.

When you finish reading the novel, send me your feedback and let's get together sometime next week if you don't mind. Till I see you, say hello to your beloved family.

Bye for now,
Muhammad

- 2- Inaccurate number: around/ approximately
- 3- Can I give less than 150 words? (Task achievement): 160 -200 words.
- 4- **Forty percent X (40 percent or 40%)**

Sample Table

You should spend about 20 minutes on this task.
The table shows the Proportions of Pupils Attending Four Secondary School Types between 2000 and 2009. Summarize the information by selecting and reporting the main features and make comparisons where relevant.
Write at least 150 words.

Note: comparison means similarities and differences.

Secondary School Attendance

	2000	2005	2009
Specialist Schools	12%	11%	10%
Grammar Schools	24%	19%	12%
Voluntary-controlled Schools	52%	38%	20%
Community Schools	12%	32%	58%

The given table reflects the percentages of students enrolled in four high schools from 2000 till 2009. In this table, there are three intervals of time: 2000, 2005 and 2009, and there are 4 types of schools: specialist schools, grammar schools, voluntary schools and community schools.

Generally, the table reflects that the least popular school by the end of the given period is specialist school and it went through a slight decrease in the number of students, **whereas** community schools recorded the highest percentage after it had had the least percentage in 2000. Overall, all percentages decreased apart from community schools.

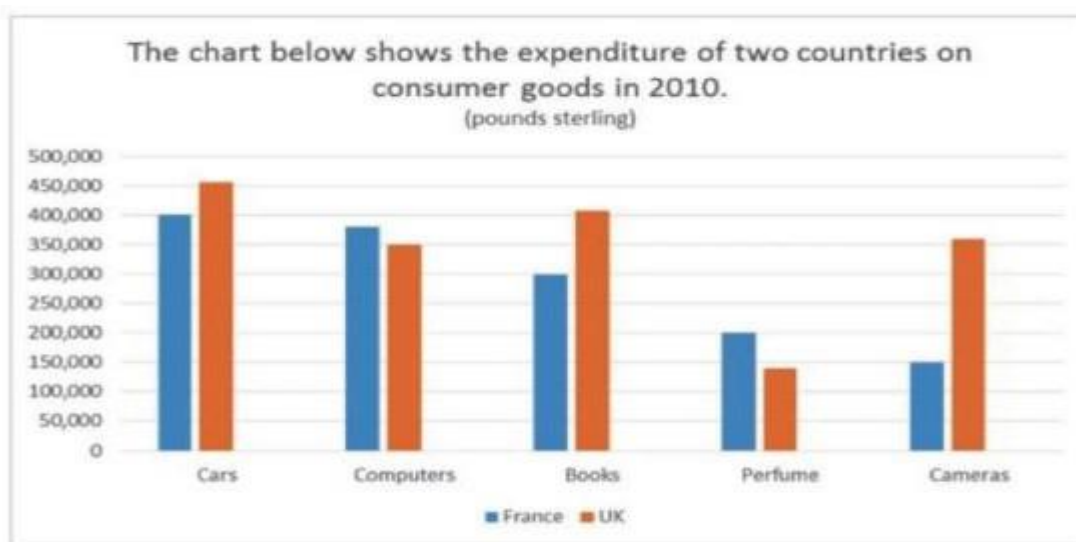

In 2000, specialist schools and community schools recorded the least percentages (12%), whilst grammar schools hit double this percentage. However, the most popular in this year was voluntary schools (52%).

Five year later, in 2005, both **voluntary** and community schools had a high number of enrollment (38% and 32% **respectively**), whilst specialist schools had a low turnout of students (11%). In fact, Grammar Schools recorded half the percentage of Voluntary schools (38%), and it reached only 19%.

Finally, 4 years later, in 2009, the percentage of students going to community schools soared to 58%, but specialist and grammar schools hit low percentages (10% and 12%). The voluntary experienced a decline in the percentage of students (20%).

(200 words in 18 mins)

Sample Bar Chart

IELTS Bar Chart Sample Answer

The chart illustrates the amount of money spent on five consumer goods (cars, computers, books, perfume and cameras) in France and the UK in 2010. Units are measured in pounds sterling.

Overall, the UK spent more money on consumer goods than France in the period given. Both the British and the French spent most of their money on cars whereas the least amount of money was spent on perfume in the UK compared to cameras in France. Furthermore, the most significant difference in expenditure between the two countries was on cameras.

In terms of cars, people in the UK spent about £450,000 on this as opposed to the French who spent £400,000. Similarly, the British spent more money on books than the French (around £400,000 and £300,000 respectively). In the UK, expenditure on cameras (just over £350,000) was over double that of France, which was only £150,000.

On the other hand, the amount spent on the remaining goods was higher in France. Above £350,000 was spent by the French on computers which was slightly more than the British who spent exactly £350,000. Neither of the countries spent much on perfume which accounted for £200,000 of expenditure in France but under £150,000 in the UK.
