<u>Analysis</u>		

We need a round of applause to everyone who scored 6.5 and 7:

- 2 essays for free correction before their exam.

Updates:

Day	Tasks
Sunday	• Submit 2 essays.
Friday, 5 July	• No session

	• We have a recorded session for revision before simulation • Exams will be sent in private at 2 PM • The last session is Wednesday, 10 July.
19 July – 2 August	- Crash practice course • 5 speaking exams • 5 writing exams • 2 weeks of daily practice • No sessions • Only one recorded session

Let's check the study plan

When to feel ready for the exam?

I want to book the exam: sit for the exam.

When to feel ready? In August (one source?)

LMS/ Study plan

<i>Speaking</i>	<i>No pauses</i> <i>No grammar mistakes</i>
-----------------	--

	<i>What to study?</i> - <i>Speaking booklet</i> - <i>Speaking exams</i>
<i>Writing</i>	- <i>Structure of task 1 and task 2</i> <i>Finish both essays in 50 minutes</i> <i>Proofreading:</i> <i>Punctuation</i> <i>Grammar videos</i> <i>Azza: articles</i>
<i>Listening</i>	<i>1.25</i> <i>Band 8/9</i>
<i>Reading</i>	<i>3 passages in 1 hour</i>

- 1- No pauses or grammar mistakes in speaking
- 2- Finish writing in 1 hour
- 3- Get band 8 in listening speed 1.25
- 4- Finish all 3 passages in 1 hour

When to book the Exam?

- *10 August – 20 August*

Study plan (comprehensive study plan)

I WILL NEVER GIVE THIS GIFT TO ANYONE.

SIMULATION ON FRIDAY...

- 1- CERTIFICATE
- 2- RECOMMENDATION
- 3- 2 ESSAYS
- 4- THE STUDY PLAN

Listening Exams:

5 types of questions:

- 1-Complete
 - 2-Map
 - 3-Multiple Choice
 - 4-Listing
 - 5- Matching
-

Speaking Revision

Phrasal verbs = 5 phrasal verbs

- 1- Look after
- 2- Opt for
- 3- Chill out
- 4- Hang out
- 5- Look into this topic
- 6- Look up to
- 7- Stand by
- 8- Fill up my time
- 9- Take up a lot of time

Reading Overview

IELTS:

- speaking

Listening

Reading (the second skill) = 1 hour (3 passages) + 40 questions + transfer time

Writing

IELTS: 3 hours without break

Speaking at the beginning of the exam

Listening is the first exam (40 questions + 30 minutes)

Reading: 1 hour (40 questions= same points)

Academic Versus GT IELTS Reading

Academic Reading	General Training Reading
3 passages	3 sections: 1-2 passages each= 5-6 passages
40 questions	
1 hour	
Academic Topics: History; language; science.	Everyday life: Work issues; Technology
Band 6: 23-26/ 40 Band 7: 30-32/ 40 Band 8: 35-36/ 40	Band 6: 30-31/ 40 Band 7: 34-35/ 40 Band 8: 37-38/ 40
No extra time for transferring answers.	

- Passage 1: 20 minutes (the easiest): 15 mins
- Passage 2: 20 minutes : 18 minutes
- Passage 3: 20 minutes : 23 minutes
- 40 question: they all have 1 mark each

Shall I start with the difficult passages?

Never never do that.

All passages have the same points

40 questions = 40 points

General: 40 questions in 1 hour

Section 1: 2 passages

Section 2: 2 passages

Section 3: 1 long passage (academic passage)

1 hour in reading + 3 passages

Shall I start with the questions or the passages?

Band 7 – 30/40

Band 7 – 34/ 40

William Kamkwamba

Reading for gist (main idea)

In 2002, William Kamkwamba had to drop out of school, as his father, a maize and tobacco farmer, could no longer afford his school fees. But despite this setback, William was determined to get his education. He began visiting a local **library** that had just opened in his old primary school, where he discovered a tattered science book. With only a rudimentary grasp of **English**, he **taught** himself basic physics **(Q1)** - mainly by studying photos and diagrams. Another book he found there featured windmills on the cover and inspired him to try and build his own.

He started by **constructing** a small model **(Q2)**. Then, with the help of a **cousin** and friend, he spent many weeks searching scrap yards **(Q3)** and found old tractor fans, shock absorbers, plastic pipe and bicycle parts, which he used to build the real thing.

For **windmill blades**, William cut some bath pipe (Q4) in two lengthwise, then heated the pieces over hot coals to press the curled edges flat. To bore holes into the blades, he stuck a nail through half a corn cob, heated the metal red and twisted it through the blades. It took three hours to repeatedly heat the nail and bore the holes. He attached the **blades** to a tractor fan (Q5) using proper nuts and bolts and then to the back axle of a **bicycle**. Electricity was generated through the bicycle dynamo. When the wind blew the blades, the bike chain spun the bike wheel, which charged the dynamo and sent a current through wire to his house.

What he had built was a crude machine that produced 12 volts and powered four lights. **(Q6)** When it was all done, the windmill's wingspan measured more than eight feet and sat on top of a rickety tower 15 feet tall that swayed violently in strong gales. He **eventually** replaced the tower with a sturdier one that stands 39 feet, **(Q11)** and built a second machine that watered a family garden.

The windmill brought William Kamkwamba instant local **fame**, **(Q7)** but despite his accomplishment, he was still unable to return to school. However, news of his *magetsi a mphepo* - electric wind - spread beyond Malawi, and eventually things began to change. An education official, who had heard news of the windmill, came to visit his village and was amazed to learn that William had been out of school for five years. He arranged for him to attend secondary school at the government's expense and brought journalists to the farm to see the windmill. **Q8** Then a story published in the *Malawi Daily Mail* caught the attention of bloggers, which in turn caught the attention of organisers for the Technology Entertainment and Design conference.

In 2007, William spoke at the TED Global conference in Tanzania and got a standing ovation. Businessmen stepped forward with offers to fund his education and projects, and with **money** donated by them, he was able to put his cousin and several friends back into school and pay for some medical needs of his family. With the donation, he also drilled a borehole for a well and water pump in his village and installed drip irrigation in his father's fields. Q9

The water pump has allowed his family to expand its crops. They have abandoned **tobacco** and now grow maize, beans, soybeans, potatoes and peanuts. The windmills have also brought big lifestyle and health changes to the other villagers. 'The village has changed a lot,' William says. 'Now, the time that they would have spent going to fetch water, they are using for doing other things. And also the water they are drinking is clean water, so there is less **disease**.' The villagers have also stopped using **kerosene** and can use the money previously spent on fuel to buy other things.(11)

William Kamkwamba's example has inspired other children in the village to pursue science. William says they now see that if they put their mind to something, they can achieve it. 'It has changed the way people think,' he says.

Questions 1-5 (All questions in reading follow a chronological order except matching heading/ information)

(read the instructions first)

Complete the flow chart below. (min 1 word / max 2)

Choose **NO MORE THAN TWO WORDS** from the passage for each answer.
Reading and listening = take answers and the keywords as they are = copy and paste

He fixed the blades to a (5) and then to part of a bicycle. tractor fan

He raised the blades on a tower.

Questions 6-10 (re-read the passage from the beginning) + restart

Do the following statements agree with the information given in the [Reading Passage](#).

T/ F/ NG (yes you can) T/ F/ NG +

- True

Question = identical to the passage.

- False

- Passage: Kawamba is famous.

- Question: not famous (False)

Question = different / opposite to the passage

- Not given (2 cases)

1- Not mentioned

Question: Kawamba started his success after marriage. (NG)

Passage: no reference to marriage.

2- Question = true + extra information = NG

In boxes **6-10** on your answer sheet, write

TRUE if the statement is true according to the passage

FALSE if the statement is false according to the passage

**NOT
GIVEN** if the information is not given in the passage

6) William used the **electricity** he created for village **transport**. False

Passage: **Electricity** was generated through the bicycle dynamo. When the wind blew the blades, the bike chain spun the bike wheel, which charged the dynamo and sent a current through wire to his house. What he had built was a crude machine that produced 12 volts and powered four lights.

7) At first, William's achievement was ignored by local people. (False)

Passage: The windmill brought William Kamkwamba instant local **fame**,

8) **Journalists** from other **countries** visited William's **farm**. (True + Question extra info) : NG

انجي

Passage: brought journalists to the farm to see the windmill.

9) William used **money** he received to **improve** water **supplies** in his village. T

10) The **health** of the villagers has **improved** since the windmill was built. T

Questions 11-13 (re-start)

Answer the questions below. (a word/ a number/ a word a number)

Use **NO MORE THAN ONE WORD** and/or **a NUMBER** from the passage for each answer.

11) How **tall** was the **final** tower that William **built**? (number?) / passage numbers **39 feet**

12) What did the villagers use for **fuel** before the windmill was built? Kerosene 12

13) What school subject has become more popular in William's village? Science

Reading Passage (Advanced Level) - 2

Employment in Japan

A. Every autumn, when recruitment of new graduates and school leavers begins, major cities in Japan are flooded with students hunting for a job. Wearing suits for the first time, they run from one interview to another. The season is crucial for many students, as their whole lives may be determined during this period.

B. In Japan, lifetime employment is commonly practised by large companies. While people working in small companies and those working for sub-contractors do not in general enjoy the advantages conferred by the large companies, there is a general expectation that employees will in fact remain more or less permanently in the same job.

C. Unlike in many Western countries where companies employ people whose skills can be effective immediately, Japanese companies select applicants with potential who can be trained to become suitable employees. For this reason, recruiting employees is an important exercise for companies, as they invest a lot of time and money in training new staff. This is basically true both for factory workers and for professionals. Professionals who have studied subjects which are of immediate use in the workplace, such as industrial engineers, are very often placed in factories and transferred from one section to another. By gaining experience in several different areas and by working in close contact with workers, the engineers are believed, in the long run, to become more effective members of the company. Workers too feel more involved by working with professionals and by being allowed to voice their opinions. Loyalty is believed to be cultivated in this type of egalitarian working environment.

D. Because of this system of training employees to be all-rounders, mobility between companies is low. Wages are set according to educational background or initial field of employment, ordinary graduates being employed in administration, engineers in engineering and design departments and so on. Both promotions and wage increases tend to be tied to seniority, though some differences may arise later on as a result of ability and business performance. Wages are paid monthly, and the net sum, after the deduction of tax, is usually paid directly into a bank account. As well as salary, a bonus is usually paid twice a year. This is a custom that dates back to the time when employers gave special allowances so that employees could properly celebrate bon, a Buddhist festival held in mid-July in Tokyo, but on other dates in other regions. The festival is held to appease the souls of ancestors. The second bonus is distributed at New Year. Recently, bonuses have also been offered as a way of allowing workers a share in the profits that their hard work has gained.

E. Many female graduates complain that they are not given equal training and equal opportunity in comparison to male graduates. Japanese companies generally believe that female employees will eventually leave to get married and have children. It is also true that, as well as the still-existing belief among women themselves that nothing should stand in the way of child-rearing, the extended hours of work often do not allow women to continue their careers after marriage.

F. Disappointed career-minded female graduates often opt to work for foreign firms. Since most male graduates prefer to join Japanese firms with their guaranteed security, foreign firms are often keen to employ female graduates as their potential tends to be greater than that of male applicants.

G. Some men, however, do leave their companies in spite of future prospects, one reason being to take over the family business. The eldest sons in families that own family companies or businesses such as stores are normally expected to take over the business when their parents retire. It is therefore quite common to see a businessman, on succeeding to his parents' business, completely change his professional direction by becoming, for example, a shopkeeper.

H. On the job, working relationships tend to be very close because of the long hours of work and years of service in common. Social life in fact is frequently based on the workplace. Restaurants and nomi-ya, "pubs", are always crowded at night with people enjoying an evening out with their colleagues. Many companies organise trips and sports days for their employees. Senior staff often play the role of mentor. This may mean becoming involved in the lives of junior staff in such things as marriage and the children's education.

I. The average age of retirement is between 55 and 60. For most Westerners, retirement may be an eagerly awaited time to undertake such things as travel and hobbies. Many Japanese, however, simply cannot get used to the freedom of retirement and they look for ways of constructively using their time. Many look for new jobs, feeling that if they do not work they will be abandoned by society. This has recently led to the development in some municipalities of municipal job centres which advertise casual work such as cleaning and lawn mowing. Given that Japan is facing the problem of an increasingly ageing society, such activities may be vital in the future.

Questions 1–9

The Reading Passage has nine paragraphs A–I.

Choose the correct heading for each paragraph from the list of headings below.

List of Phrases

i how new employees are used in a company
ii women and Japanese companies
iii why men sometimes resign from Japanese companies
iv permanency in employment in Japan
v recruiting season: who, when and where
vi the social aspect of work
vii the salary structure
viii the recruitment strategy of foreign firms
ix Japanese people after retirement

- 1) Section A
- 2) Section B
- 3) Section C
- 4) Section D
- 5) Section E
- 6) Section F
- 7) Section G
- 8) Section H
- 9) Section I

Questions 10–12

Complete the sentences below with words taken from the reading passage. Use **NO MORE THAN THREE WORDS** for each answer.

- 10) Japanese employers believe that moving professionals within companies and listening to workers' views leads to
- 11) Employees receive their wages monthly and a bonus
- 12) Japanese workers often form close personal relationships and older staff may even become a to junior staff.

Questions 13–15

Choose the correct letter, **A, B, C or D**.

- 13) **Company training in Japan**
A) is not important
B) is for factory workers only
C) is for professionals only
D) is for all staff
- 14) **Foreign firms are keen to employ Japanese women because**
A) the women are more intelligent than men
B) the women that apply are more capable than the men that apply
C) the women will be only short-term employees
D) the women prefer guaranteed security
- 15) **Japanese people continue to work after retirement because**
A) they need the income
B) they miss working
C) they assist in the family business
D) they have no status outside employment

Writing Task 1 ACADEMIC Sample Essay

You should spend about 20 minutes on this task.

The line graph shows visits to and from the UK from 1979 to 1999, and the bar graph shows the most popular countries visited by UK residents in 1999.

Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.

Both charts tackle the number of tourists and the popular destination to the UK citizens. The line chart provided reflects the tours to and from England in a span of 20 years between 1979 and 1999, whereas the given bar chart depicts the favourite tourist destinations by the British locals in the year of 1999.

Overall, after looking at both charts, it is obvious that the number of tourists who left the UK or went to the UK increased, whilst the bar chart reflects that France was the most visited country and Turkey was the least popular tourist destination.

Regarding the line chart, it is clear that in 1979 the number of tourists that travelled to and outside the UK was almost the same and recorded around 10 millions or slightly above.

Later on, in 1984, both trends increased gradually but diverged in 1989 because while the UK **nationals** who travelled outside the UK were 30 million, the others were only 20 millions. Towards the end of the given period, the gap between both trends became wider, as people who left the UK to other countries were slightly higher than 50 million but those who travelled to the UK were still slightly less than 30 million.

Moving to the bar chart, when we look at the countries which the UK citizens visited in 1999, it can be witnessed that France attracted more than 10 millions tourists and it was followed by Spain where slightly less than 10 million went to. However, other countries like Turkey and Greece similarly were less popular and less than 5 millions visited them.
